

Building a Community of Practice (CoP) to support scalable governance and the management of FAIR sensitive data use

Dr Jenni Harrison¹, Professor Suzanne Robinson¹, Ms Kirsten Jackson² & Mr Matthew Gorringer²
Curtin University¹ & The Sax Institute²

Acknowledgement of Country (Boodja)

I would like to acknowledge
the Whadjuk Noongar people
on whose land I am on today.

I pay my respects to their
Elders, past present and
emerging.

Scalable Governance, Control and Management of FAIR Sensitive Research Data Project – funded by the ARDC

Expected completion date: **30 June 2023**

Investment by ARDC: **\$953,666**

Collaboration between: Monash University*, Curtin University, QCIF, the Sax Institute, University of NSW & Swansea University

*Lead agent

Scalable
Governance,
Control and
Management
of FAIR
Sensitive
Research Data
Project

Deploy and manage SeRP as a nationally service

Onboard exemplar research projects on SeRP service

Communities of Practice: enabling training, knowledge sharing, development and dissemination of best practices and principles.

Create a pipeline of projects across project partners

What is FAIR?

Findable

- Well described
- Persistent ID

Accessible

- Understandable metadata
- Trusted repository

Interoperable

- Common language used
- Clearly represented

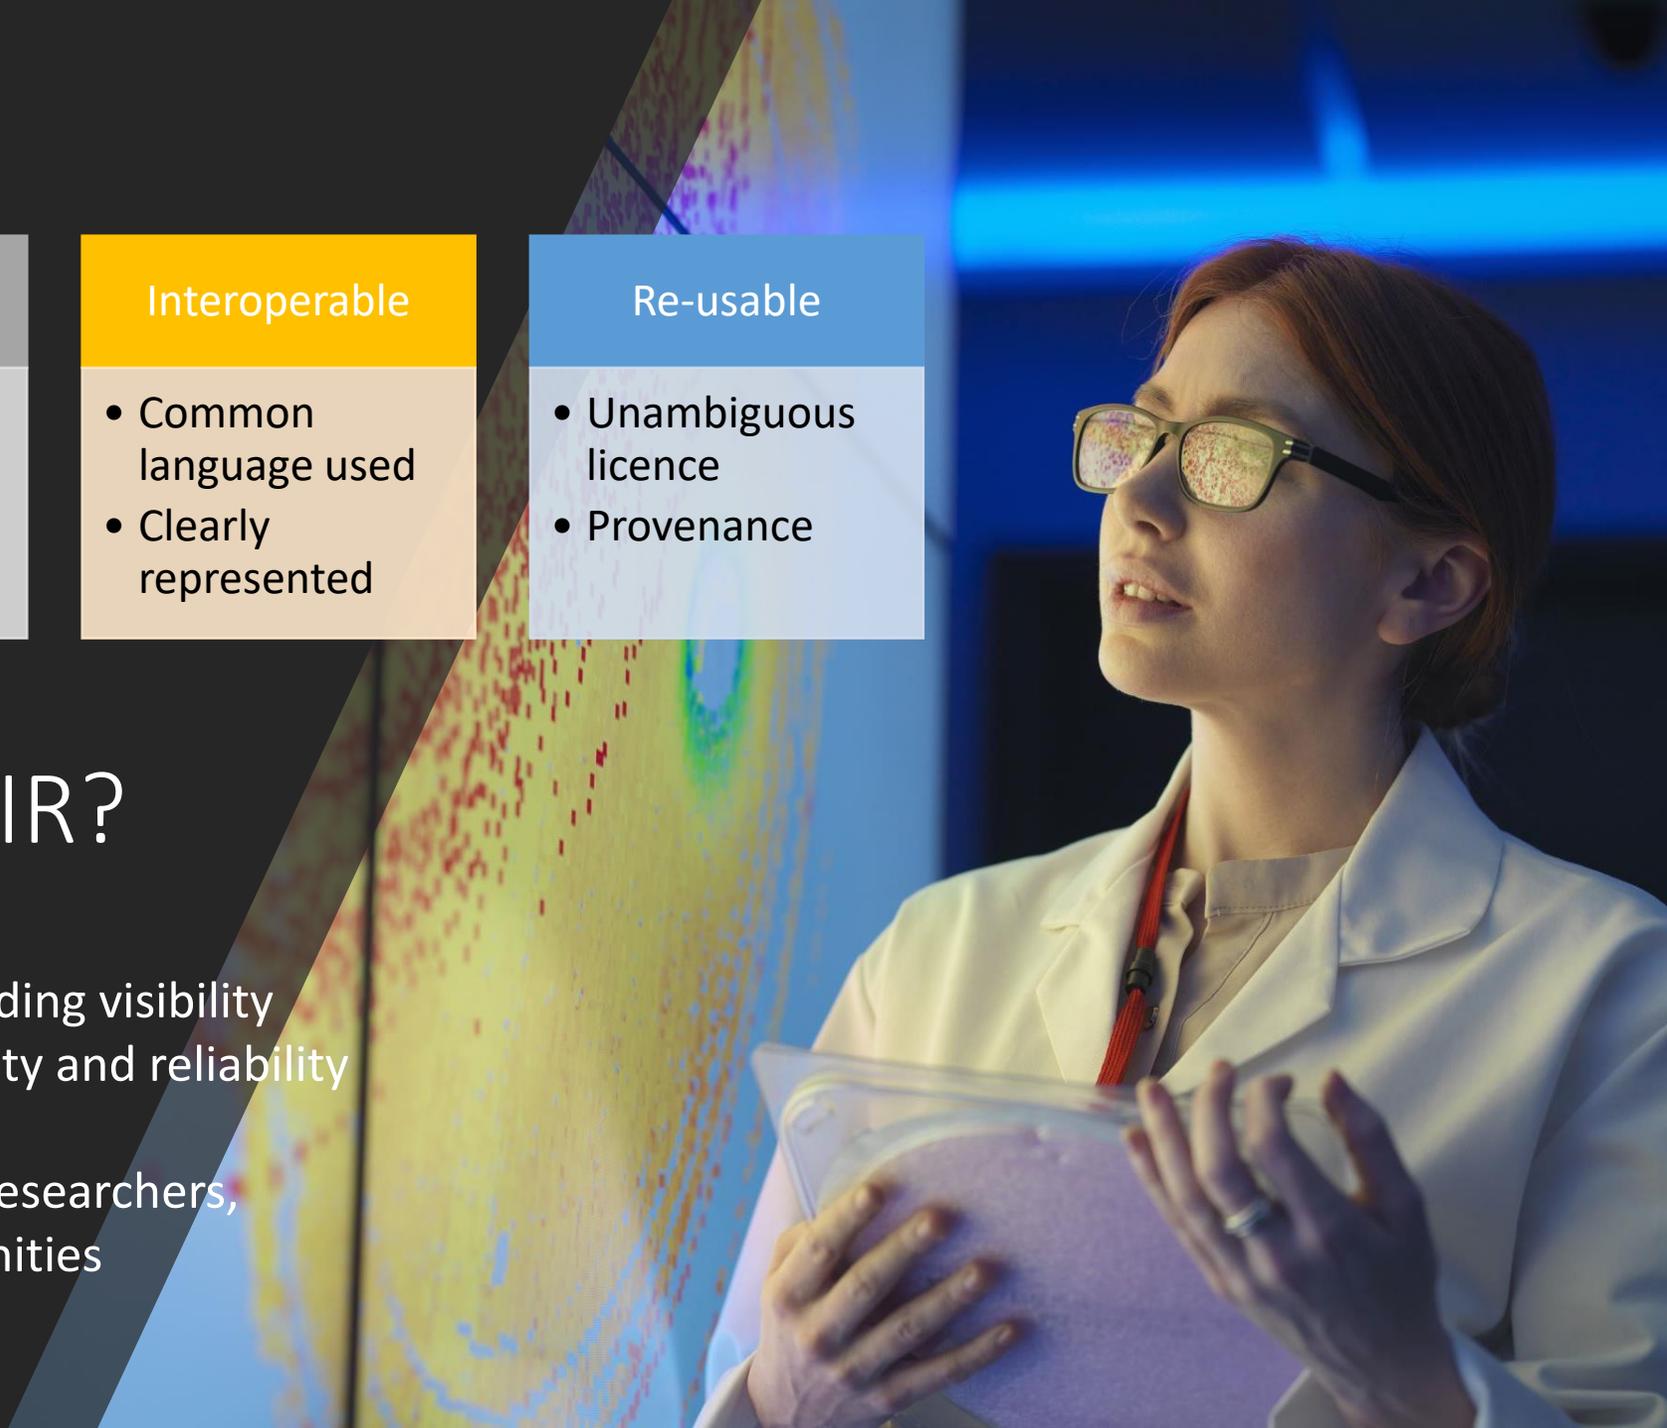

Re-usable

- Unambiguous licence
- Provenance

Why make data FAIR?

Benefits include:

- Increasing research impact including visibility
- Improving research reproducibility and reliability
- Enabling new research outcome
- Supporting collaborations with researchers, industry, government & communities

BoF aims to
provide
researchers
with:

**An opportunity to join
the Data Custodian CoP**

An understanding of SeRP & opportunities

An awareness of the Data Custodian CoP

An opportunity to get involved

An opportunity to discuss co-designing training resources

An opportunity to discuss best practice and principles

An opportunity to guide the CoP reducing complexity & barriers
for those undertaking collaborative sensitive data research

To comment on ways to make the CoP sustainable (beyond
existing funding streams)

What is Secure eResearch Platform?

- Comprehensive robust platform supporting researchers to securely access data for analysis
- Accommodates large quantities of data
- Underpinned by governance & secure access arrangements
- Enables collaboration

Who is this project for?

- Researchers need access to secure & robust data analysis platforms for sensitive data investigations
- Data Custodians require a robust, secure, accredited & governed environment to satisfy requirements, enabling the safe release of data

SeRP is for:

Researchers / organisations dealing with sensitive data, Government & Infrastructure providers

Data Custodian CoP Discussion

- Audience participation
- Zoom chat comments / questions
- Shared document for comments

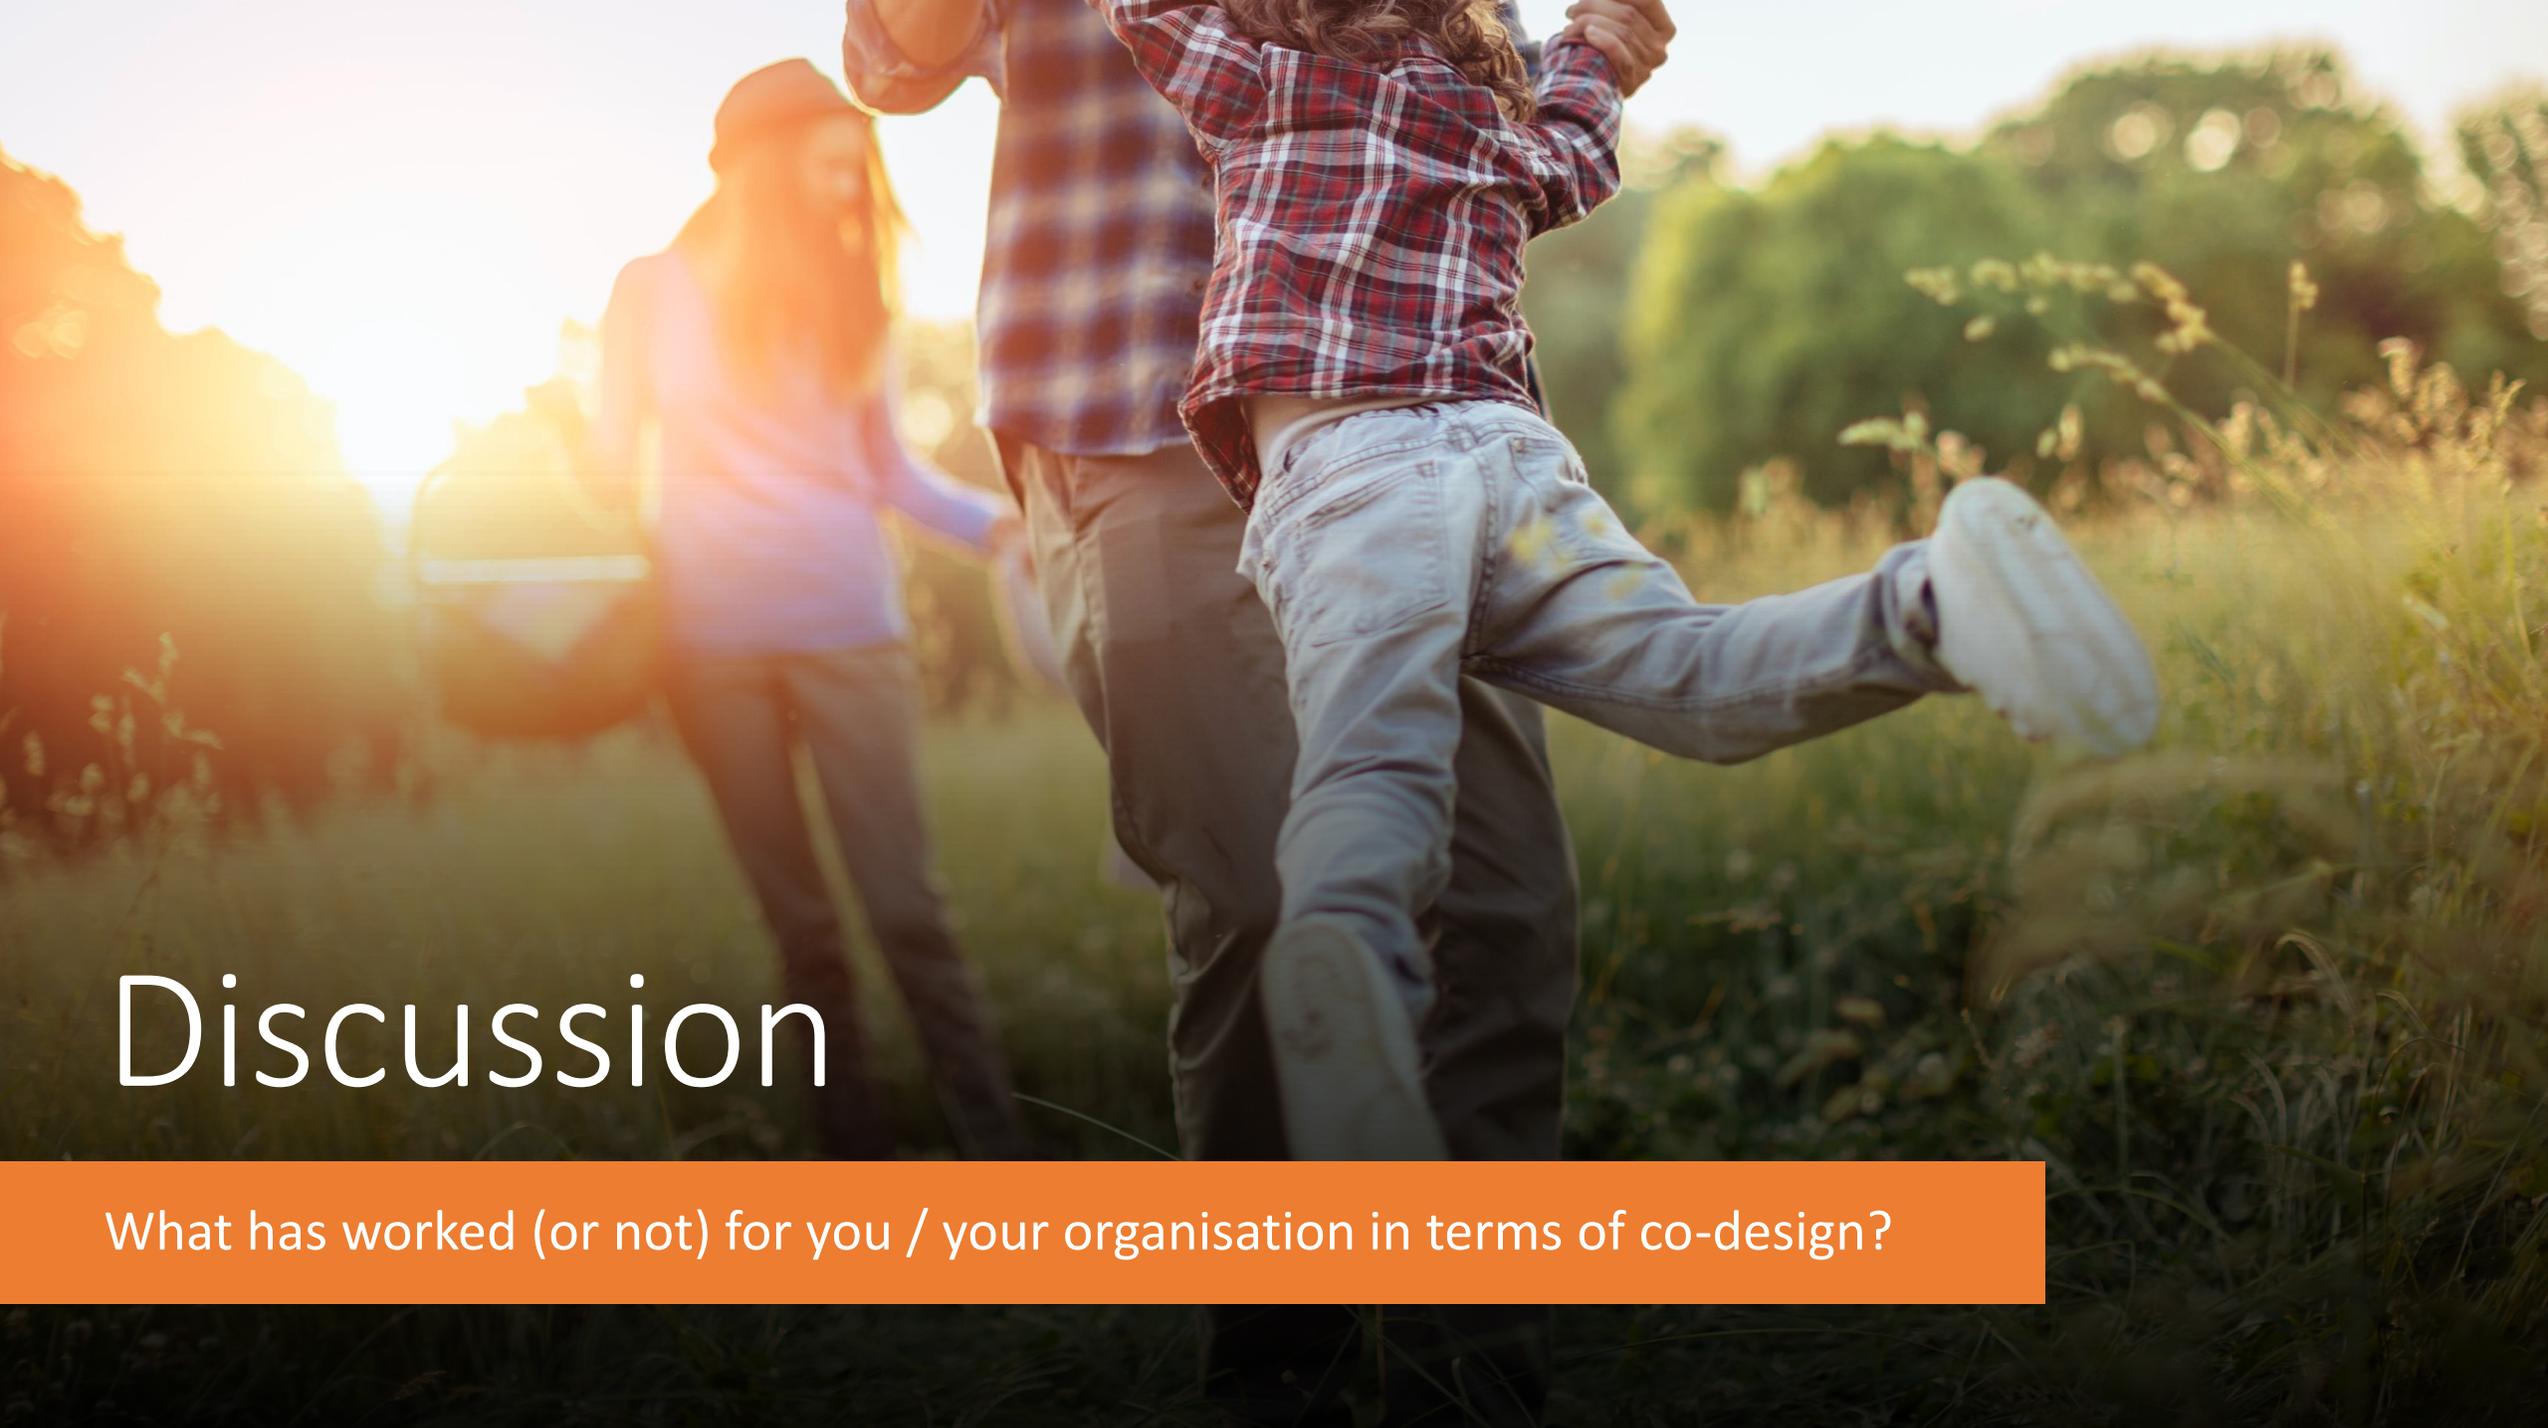

Discussion

What makes a good Data Custodian CoP?

Discussion

What do you need from the Data Custodian CoP?

Discussion

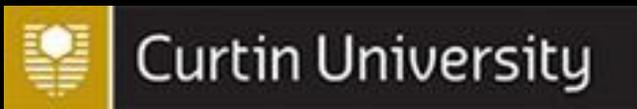

What has worked (or not) for you / your organisation in terms of co-design?

Discussion

What do you think is best practice?

Thanks for listening
